

# Photoshop for Artists

Jane Hodgson workshops

[www.janehodgson.co.uk](http://www.janehodgson.co.uk)

**Who is it for:** Artists with knowledge of their own computers.

**Class size:** 2-6. Individual tuition can also be arranged.

**Duration:** Sessions of 3 hours duration

**Cost:** £110 (divided between participants).

**Please note:** Students will need their own laptop, (or share a friend's), and Photoshop or Photoshop Elements, see below for download information.

**Where:** In my house, Bovey Tracey, or to your own premises.

## Workshop includes:

Importing images, layers, filters, text, general image manipulation and preparation for print, together with individual requirements.

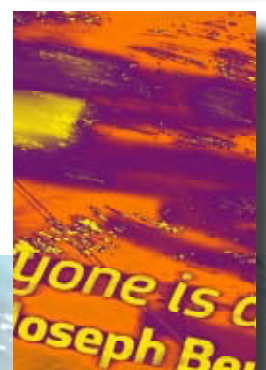

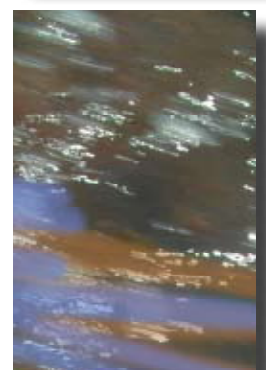

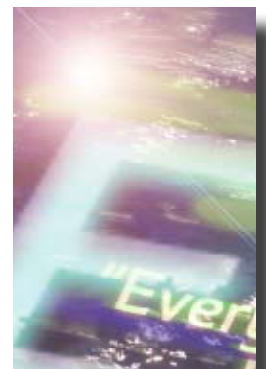

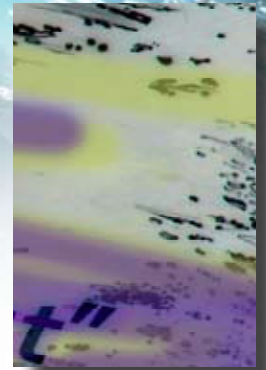

## What you will need:

A suitable digital image, loaded on to your computer, for you to work on, and an idea or two of what you would like to achieve. Photoshop is a very powerful program and can do all sorts of wierd and wonderful things. I teach with the premise that we don't simply allow the program to do the work, but explore it's tools to achieve what we have in mind. Along the way things may change, but the initial idea is yours.

## To download Photoshop Elements (please check system requirements given on website):

Students will work on their own computer, (or share a friend's), and need Photoshop or Photoshop Elements. You can download Photoshop Elements by following this link: <http://www.adobe.com/uk/products/photoshopelwin/>. It costs £74.75. Alternatively you can have a free 30 day trial. Photoshop CS4 costs £615.25, and you can find it on the same site.

PS Elements does have limitations, but can also do a lot of the same functions as the full version of PS. All the examples on the right I have produced using PS Elements.
