# COLLABORATIVE MOBILE -

Each child designs then paints an acrylic disk following the school's chosen theme. They are all then made in to a whole mobile.

**Ages:** KS2 - 3

**Class size:** Maximum 25 - 30.

**Duration:** One day.

**Cost:** £200 + travel expenses.

**Please note:** All workshops can be adapted to suit individual requirements.

## Key Processes include:

**Science & Geography** – both incorporated and dependent on the theme chosen.

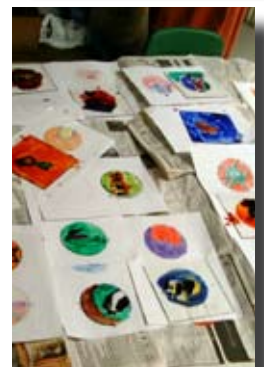

**Art and Design** – to design from their imagination; mix media and processes including drawing and 3D; consider and explore colour, pattern and texture; share ideas and collaborate.

## Details:

First we discuss the school's theme, it may be birds or trees for example. The children will have a chance to share their knowledge to the group. Then they design their part of the mobile, which will be a circular acrylic disk. They make a number of coloured drawings.

Children then choose their favourite design and trace the design with water soluble inks on to the acrylic disks. The disks are then fixed to rods with fishing line to make a collaborative mobile.

Children are paired up with a partner, so they can help one another.
